WORK EXPERIENCE

Software Engineer

Since February 2015

Scribd (everand.com, scribdinc.com)

San Francisco, CA

- Built a data warehouse orchestration system in JRuby that ran in production for 5 years before being replaced by Airflow.
- Extended our book metadata parser to accept ONIX version 3.0.
- Maintained and extended our publisher payouts (royalties) system, migrated it from JRuby to Spark.
- Migrated our monolith app from Rails 4 to 5, and contributed to later migrations.
- Migrated different parts of our architecture from colocated servers in IBM SoftLayer to AWS.
- Mentored junior engineers and interns, and conducted interviews for a variety of backend teams.

Software Engineer

October 2014 – March 2015

Rebuss (rebuss.cl)

Santiago, Chile

- Built a new Rails-based app for on-site warehouse inventory management, replacing a legacy Visual Basic app.
- Implemented web-based logic for handling barcode and fingerprint readers.
- Implemented automatic provisioning of laptops along with ad-hoc networking for operation without internet access.

Software Engineer and CTO

June 2010 – August 2014

ComparaOnline (comparaonline.cl)

Santiago, Chile

- Developed and maintained a website for online comparison of auto insurance options.
- Integrated insurance company web services for providing quotes to customers.
- Helped grow the team from 4 to 20 engineers.
- Set up Asterisk telephony integration with web app for instant communication between customers and helpdesk agents.
- Managed servers on AWS, handled monitoring and app deployment, and solved performance bottlenecks, mostly DB-related.

Software Engineer

March 2009 – May 2010

Lemontech (lemontech.com)

Santiago, Chile

- Maintained web app for government-regulated operation of Online Medical Leave (licencia.cl).
- Introduced automated deployment and database migrations to an existing PHP codebase.
- Managed two other engineers.

Freelance Developer

2005 – 2009

- Created a Rails web app for automatic collection of donations from credit card issuers for an educational foundation.
- Created a Rails web app for the yearly enrollment process of 1,400 students.

PROJECTS

Escala de Notas (escaladenotas.cl)

Since 2008

- Ruby web app for assisting Chilean teachers, students and parents with evaluation grading.
- Used by most high school teachers and many higher education professionals (1M weekly pageviews during high season).

EDUCATION

Pontificia Universidad Católica de Chile

2000 – 2006

Industrial Engineer, Computer Engineering diploma. Academic certificate in Social Psychology.

Santiago, Chile

- Teaching assistant across a variety of computer science courses at the School of Engineering.
- Thesis: “Development of distributed plugins as REST web services”. Available in Spanish at pumarino.org/memoria.

SKILLS

- **Ruby** programmer since 2005; **Rails** since 2006, mainly with **MySQL**.
- Data analysis and processing pipelines with **Spark/Scala** since 2016.
- Domain-specific knowledge in the ebook and audiobook publishing industry.
